

Accessibility

Test Your Compliance Levels Quickly and Easily

Monsido's Accessibility Module gives you an immediate overview of your site's compliance levels, saving you time and effort by removing the guesswork and letting you know where to focus your efforts in order to meet with current standards (WCAG 2.1, ADA Section 508).

Select the compliance level (WCAG A, AA, and AAA) that applies to your organization and see your website improve with every issue you fix. Work your way up to higher levels of compliance to build a website which delivers a great user experience while serving as a role model for other organizations in your industry.

Key Features

Locate Accessibility Issues

Locate and review a wide variety of accessibility issues at the touch of a button with our Accessibility Fast Track® feature.

Track Issues

Get a comprehensive list of failed checks based on WCAG 2.1 Guidelines as well as the pages on which they occur.

Filter Scan Results

Filter results so that, for example, confirmed issues can be given priority over potential issues that need to be reviewed.

Built-in Help Center

Get detailed information about compliance issues, instructions for remediation, and examples of code that will pass or fail.

Track Pages with Failing Checks

Keep up to date with the number of views your pages with potential errors are receiving.

Whitelist Known Elements

Use the *Source Code Exclude* function to set personalized exclusions to your accessibility checks and avoid certain elements being flagged as potential issues.

About Monsido

Monsido is a fast-growing software company founded in 2014 that provides a one-stop web governance solution designed to give website visitors a superior browsing experience. Our time-saving auditing tool provides accurate and insightful information that helps organizations work with confidence to identify accessibility and quality assurance issues. This enables them to optimize their online presence and ensure compliance with legal requirements. Monsido has offices in the United States, United Kingdom, Australia, and Denmark. For more information, visit www.monsido.com

Review Issues Instantly

Our Accessibility Fast Track feature allows you to locate and review elements such as links, images, and text in bulk at the touch of a button.

Fast Track instantly identifies HTML snippets that exist across your site and applies accessibility checks to them for you to review. Snippets are presented in order by the level of impact they have on your compliance rate.

Scan for Issues

Get an immediate overview of how your site is doing with regards to accessibility as well as a comprehensive list of issues found and the pages on which they occur. Issues can be sorted by error type, page, or HTML snippet.

Ensure PDFs Are Accessible

We have teamed up with CommonLook, a world-leading provider of PDF software, to make a scanning tool available as an add-on. The tool provides you with a detailed list of discovered accessibility issues and allows you to keep track of which files have been fixed and those that have not.

Correct Errors without Having to Login to Your CMS

Instantly address accessibility errors directly on the Monsido platform without having to login to your CMS with our PageCorrect™ add-on.

Let Visitors Customize Their Own Experience

Our PageAssist™ add-on enables you to give your visitors control over the way they experience your website based on their own unique requirements.
