# Heartbeat

## See How Your Website Is Performing

Does your website respond quickly and is its performance in line with industry standards? A slow or unresponsive site can severely damage your visitors' experience and your search engine rankings.

Monsido's Heartbeat module allows you to monitor your site's performance and stay alert to slow response times and outages before they become an issue for your visitors.

## Key Features

### Overview of Website Performance

Get a comprehensive overview of your site's performance including average uptime and average response time.

### Automated Alerts

Receive real-time alerts when your site is down or running slowly.

### Assign Notifications

Assign targeted notifications to specific team members.

### Reports Sent Directly to Your Inbox

Have key data sent directly to your inbox without the need to login to the platform.

### Easy to Understand Graph

Our easy to understand graph visually illustrates your site's response time across all checkpoints and details incidents such as outages.

### Set Exemptions to Heartbeat Notifications

Add time slots for periods where you do not wish to receive notifications on downtime and slow response times, such as during regularly scheduled website maintenance.

## About Monsido

Monsido is a fast-growing software company founded in 2014 that provides a one-stop web governance solution designed to give website visitors a superior browsing experience. Our time-saving auditing tool provides accurate and insightful information that helps organizations work with confidence to identify accessibility and quality assurance issues. This enables them to optimize their online presence and ensure compliance with legal requirements. Monsido has offices in the United States, United Kingdom, Australia, and Denmark. For more information, visit [www.monsido.com](http://www.monsido.com)

## Monitor Your Site's Performance

Monitor your server's response time, check that your site is performing optimally, and ensure that you are meeting your visitors' expectations.

## Real-Time Alerts

Get automated updates on your website's performance and receive real-time alerts when it is experiencing downtime or running slowly.

## Assign Your Team Notifications

Assign notifications to specific team members to ensure that the right people always have the key information required to perform their tasks effectively.

## Graph Showing Average Response Time and Downtime

Our easy to follow graph gives you a detailed visual overview of your site's average response time and downtimes during a selected time-frame.

## Reports Sent Directly to Your Inbox

Heartbeat reports can be scheduled to be sent directly to your inbox after every scan without the need to log into the platform. The report gives you a complete overview of all the incidents on your domain and a detailed breakdown of each downtime period.
