Performance Module

Ensure Your Site Is Performing Optimally and Meeting With Industry Standards

Make your website faster and see how it is experienced by visitors in different locations and those using different devices and network speeds.

Monsido's Performance module eliminates the guesswork involved in speeding up your website by automatically identifying elements that are slowing it down so you can take targeted measures to improve its performance.

Using Google's Lighthouse API open-source auditing tool for developers, the module allows you to audit your web pages for metrics such as first paint, first meaningful content paint, and time to interactive, in order to identify any lag and improve your visitors' experience.

Key Features

Google Lighthouse Score

See how your site is performing right now by getting a Lighthouse score from 0-100.

Experience Your Pages As Your Visitors Experience Them

Experience your web pages as your visitors experience them by creating user profiles that mirror your most common visitors.

See How Your Pages Perform On Different Devices, Locations, and Internet Speeds

Ensure your web pages are performing optimally for all your visitors by seeing how they function on different devices, network speeds, and in a variety of locations.

Detailed Reports with Actionable Optimization Suggestions

Get regular reports detailing actionable and easy to understand recommendations and opportunities for optimizing your website.

Performance Timeline

See how your pages' performance evolves over time and identify performance gaps.
