Over the past 20 years, esolutionsgroup, a GHD Company, has emerged as a premier full-service agency for municipalities and other local government agencies. As experts within the public sector, they educate, deliver, and maintain accessibility standards that help connect local communities with cities, towns and agencies. As leaders within the public sector, they work with their clients to deliver digital solutions and services that help connect local communities with cities, towns and agencies.

This enables them to optimize their online experience, the CMS also helps ensure that forms are accessible to a more seamless user experience as a deep link integration has been developed between Monsido and i:Create. This allows users to work with Monsido directly within the i:Create CMS, making it quick and easy to correct any errors identified during a scan by Monsido.

Beyond the technical set up, esolutionsgroup and Monsido also share a similar vision to make an impact for users of all abilities to digitally engage with local governments.

“We're so pleased that the team at Monsido has been so collaborative when it comes to working with us to promote accessibility.”

An example is one of the collaborative efforts we've created together in a webinar on "Fostering An Accessibility Mindset" which premiered in December 2020. Looking to the future, Monsido and esolutionsgroup are looking to partner more on more inspirational content, valuable content, accessibility campaigns and more.
