

Data Privacy Module

Take Control of the Data on Your Website

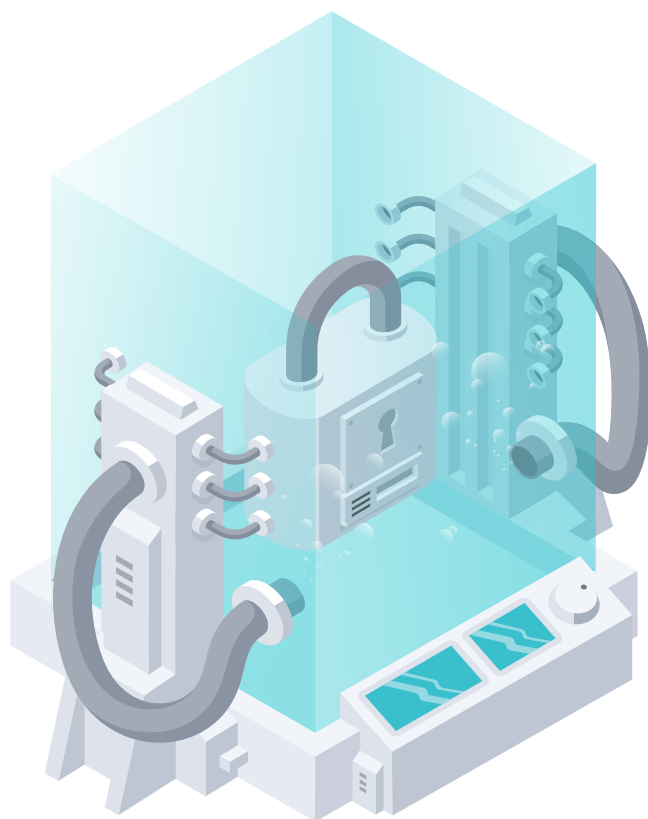

Monsido's powerful new Data Privacy module allows you to take control of the data on your website and demonstrate your efforts to be compliant with existing data privacy standards. The easy-to-use tool allows you to automate the management of your website's personal data by scanning your domain in order to identify and categorize potential privacy issues.

Automate the Management of Your Website's Personal Data

Take the hard work out of managing the personal data on your website by automatically discovering and classifying sensitive information.

Customize Scans Based on Existing Data Privacy Standards

Scan your website against existing privacy standards such as the GDPR (General Data Protection Regulation), the CCPA (California Consumer Privacy Act), and the APA (Australian Privacy Act).

Key Features

-  **Organize Findings by Severity**
Quickly and easily prioritize potential issues by identifying the level of risk associated with the different data on your website.
-  **Export Findings**
Instantly export data privacy related findings outside the Monsido platform itself, for example when compiling reports.
-  **Scan Pages and PDF Documents**
Discover how severely your pages and PDF documents are affected by data issues, determined by how many notifications are shown, how many views the content has, and by how severe the issues are.
-  **Checklist**
Get a list of data privacy checks ranked in order of priority, identify the checks your domain has passed, and see how compliant you are with established data privacy standards such as GDPR, CCPA, and APA.
-  **Detailed Reports and Audit Log**
Schedule reports to be sent to yourself or to other members of your organization after every data privacy scan is completed and keep track of data privacy decisions with a detailed audit log.

About Monsido

Monsido is a fast-growing software company founded in 2014 that provides a one-stop web governance solution designed to give website visitors a superior browsing experience. Our time-saving auditing tool provides accurate and insightful information that helps organizations work with confidence to identify accessibility and quality assurance issues. This enables them to optimize their online presence and ensure compliance with legal requirements. Monsido has offices in the United States, United Kingdom, Australia, and Denmark. For more information, visit www.monsido.com

Rank Potentially Private Data From Low to High Severity

Organize the data on your website based on its potential to adversely affect organizational assets, organizational operations, and individuals should it be disclosed without authorization.

Get an Overview of All the Data on Your Website

Instantly locate different types of potentially sensitive personal data, such as banking details, passport numbers, medical information, and much more across your website at the touch of a button and reduce the risk of litigation.

Prove Your Efforts to Comply With Data Privacy Standards

Document your efforts to protect personal data on your website so that they can be presented to management and relevant authorities.
